The Story

When Dr. Martinez and his team uncover an ancient Mayan burial mound, they find the skeletal remains of a powerful priest, adorned with a jade mask and surrounded by sacred trinkets. The mound, over 900 years old, holds more than just relics; among these artifacts, they discover an SS medal from a Nazi officer that raise questions that defy the boundaries of history and science.

Funded by billionaire Maxwell Adler, the excavation takes a dark turn when armed men hired by Adler himself attack the site, kidnapping several archaeologists, including Dr. Martinez, and leaving others for dead.

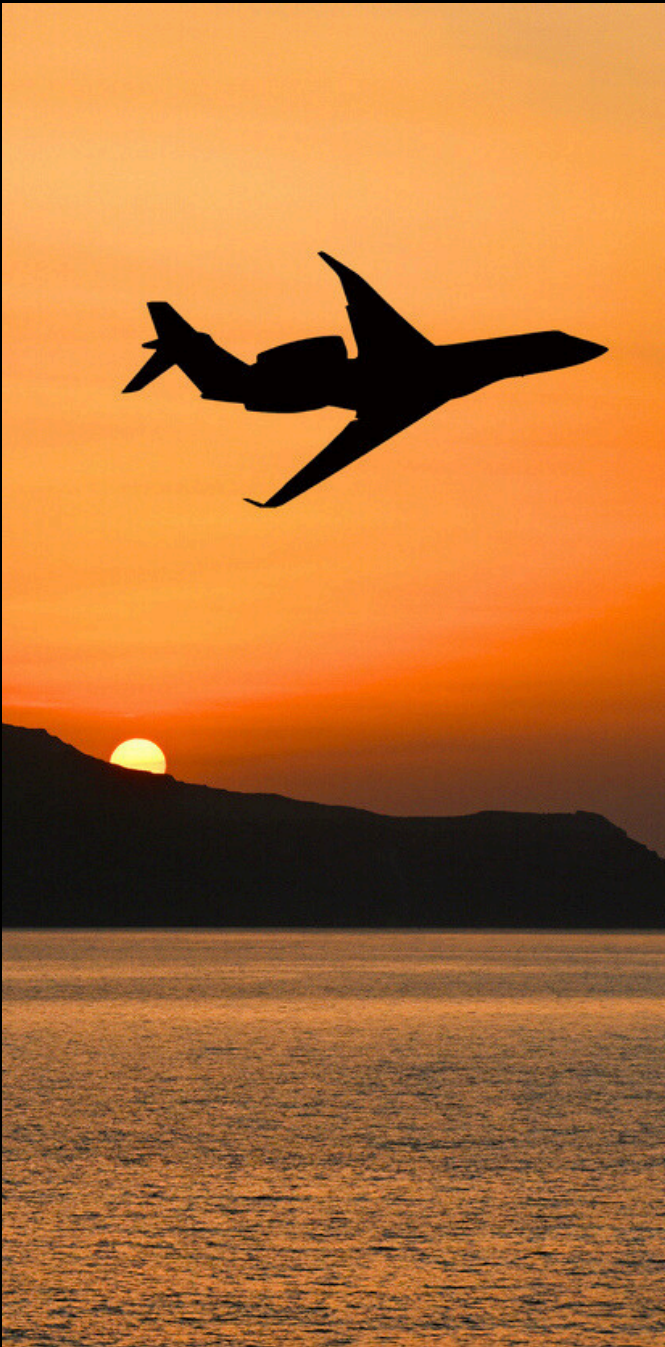

Maxwell Adler is not just an ambitious entrepreneur. Unbeknownst to many, he is the direct descendant of a Nazi family. His grandfather, a notorious scientist, conducted horrific experiments on concentration camp prisoners and left behind a journal detailing his role in the founding of the Vril society - a secretive Nazi group rumored to have explored esoteric knowledge and advanced technologies in search of creating the perfect race. Now, Maxwell seeks to control a portal discovered at a Mayan cenote, intending to harness its power to bring forth the Fourth Reich.

Twin sisters Isadora and Camila Vega, estranged for years, are key characters in Maxwell's sinister plot.

Isadora, a successful model, is lured under the pretense of a high-profile job in Italy, only to be kidnapped and taken to a secret jungle compound deep in the Yucatan peninsula. Camila, a dedicated physician, discovers her sister's disappearance and sets off to find her. She teams up with Daniel, a rugged survivor from the excavation shooting who has been on the run for over a year.

As the mysteries of the Mayan site and the portal unfold, the twins must reconcile and harness their unique connection to destroy the portal. Together, they embark on a perilous journey, facing unimaginable dangers, ancient mysteries and uncovering hidden truths about their family's past.

With the fate of humanity hanging in the balance, they must stop Maxwell before he can rewrite history and establish a new world order.
